

NNIT CRM Project - API Documentation

Production Domain: <https://chronolms.com>

Integration Guide for n8n Workflows (Customer, Lead & Lead Follow-up APIs)

1. Production Domain & Authentication Overview

Production Domain: <https://chronolms.com>

Local Development Domain: <http://127.0.0.1:8000>

Authentication Method: JWT (JSON Web Token)

Swagger UI: <https://chronolms.com/swagger/> | **ReDoc UI:** <https://chronolms.com/redoc/>

1.1 JWT Token Generation (POST /token/)

Production Endpoint: POST <https://chronolms.com/token/>

Local Endpoint: POST <http://127.0.0.1:8000/token/>

Header: Content-Type: application/json

Request Body:

```
{
  "username": "YOUR_SERVICE_ACCOUNT_USERNAME",
  "password": "YOUR_SERVICE_ACCOUNT_PASSWORD"
}
```

Response Payload:

```
{
  "refresh": "eyJhbGciOi...",
  "access": "eyJhbGciOi..."
}
```

Header for all n8n Nodes: Authorization: Bearer <access_token>

1.2 Token Refresh & Verify

Refresh: POST <https://chronolms.com/token/refresh/> | **Verify:** POST <https://chronolms.com/token/verify/>

2. Customer API (/lead/customer/)

2.1 Search Customer by Mobile Number

Production: GET <https://chronolms.com/lead/customer/?search=9876543210>

Local: GET <http://127.0.0.1:8000/lead/customer/?search=9876543210>

2.2 Create Customer

Production: POST <https://chronolms.com/lead/customer/>

Local: POST <http://127.0.0.1:8000/lead/customer/>

Headers: Authorization: Bearer <access_token>, Content-Type: application/json

Request Body Example:

```
{
  "name": "Rahul Sharma",
  "contact_number": "9876543210",
  "secondary_contact_number": "9876500000",
  "email": "rahul.sharma@example.com",
  "poc_name": "Rahul Sharma",
  "poc_contact_number": "9876543210",
  "address": "Plot 45, Industrial Area",
}
```

```

    "city": "Pune",
    "state": "Maharashtra",
    "pin_code": "411001",
    "gst": "27AAAAA0000A1Z5",
    "pan": "ABCDE1234F",
    "remark": "Added automatically via n8n integration"
  }

```

Field Name	Type	Description
id	Integer	Customer ID (Read-only)
name	String	Customer / Company Name (Required)
contact_number	String	Primary Phone (Unique)
email	Email	Primary Email Address
poc_name	String	Point of Contact Name
address / city / state	Text/String	Address Details
gst / pan	String	GST & PAN Tax Numbers

3. Lead API (/lead/lead/)

3.1 Create Lead

Production: POST <https://chronolms.com/lead/lead/>

Local: POST <http://127.0.0.1:8000/lead/lead/>

Headers: Authorization: Bearer <access_token>, Content-Type: application/json

Request Body Example:

```

{
  "customer": 101,
  "contact_person_name": "Rahul Sharma",
  "contact_person_number": "9876543210",
  "requirements_details": "Customer requires NNIT project solution.",
  "lead_source": "google_ads",
  "status": "open",
  "lead_type": "sales",
  "is_service_lead": "sales",
  "project_name": "Baner Commercial Project",
  "project_address": "Baner, Pune",
  "enquiry_date": "2026-09-12",
  "followup_date": "2026-09-15",
  "remarks": "Inquiry received from Website Lead Form"
}

```

3.2 Enums & Special Endpoints

lead_source: google_ads, indiamart, bni, justdial, reference, architect/interior_designer, builder, existing_customer, ka_staff, other

status: open, in_process, close_win, close_loss, closed

Latest Lead by Mobile: GET <https://chronolms.com/lead/lead/latest-lead-by-mobile/?mobile=9876543210>

4. Lead Follow-up API (/lead/lead-followups/)

4.1 Create Lead Follow-up

Production: POST <https://chronolms.com/lead/lead-followups/>

Local: POST <http://127.0.0.1:8000/lead/lead-followups/>

Headers: Authorization: Bearer <access_token>, Content-Type: application/json

Request Body Example:

```
{
  "lead": 25,
  "followup_date": "2026-09-12",
  "next_followup_date": "2026-09-18",
  "interaction_type": "call",
  "client_response": "positive",
  "followup_status": "completed",
  "status": "in_process",
  "conducted_by": "N8N Automation",
  "contacted_person": "Rahul Sharma",
  "remarks": "Discussed NNIT project requirement",
  "discussion_notes": "Sent proposal over email",
  "client_commitment": "Will review and reply by Monday",
  "our_commitment": "Follow up on Monday 11 AM"
}
```

4.2 Enums & Filter

interaction_type: call, whatsapp, email, video_call, in_person, demo, site_visit

client_response: very_positive, positive, neutral, negative, no_response, call_back_later

List Follow-ups for Lead: GET <https://chronolms.com/lead/lead-followups/?lead=25>

5. All Other Project Module Endpoints

Product API: <https://chronolms.com/product/> | **Quotation API:** <https://chronolms.com/api/quotation/>

AMC API: <https://chronolms.com/api/amc/> | **Service API:** <https://chronolms.com/services/>

6. N8N Workflow Setup Step-by-Step

Step 1: Trigger Node (Webhook / Form)

Step 2: JWT Token Node (POST <https://chronolms.com/token/>)

Step 3: Search Customer (GET [https://chronolms.com/lead/customer/?search={{ \\$json.body.mobile }}](https://chronolms.com/lead/customer/?search={{ $json.body.mobile }}))

Step 4: IF Node (Check Customer Exists)

- If YES: Use existing Customer ID
- If NO: POST <https://chronolms.com/lead/customer/> to Create Customer

Step 5: Create Lead Node (POST <https://chronolms.com/lead/lead/>)

Step 6: Create Initial Follow-up (POST <https://chronolms.com/lead/lead-followups/>)
